Voya Financial, Inc.
Talent Acquisition — Summer Internship Program
United States (Remote)

Re: Summer 2026 Internship Program

Dear Hiring Team,

I am writing to express my interest in Voya Financial's Summer 2026 internship program, having applied to positions across Investment Data & Analytics, Technology, and Finance. As a junior studying Industrial & Systems Engineering at Georgia Tech with a concentration in Analytics & Data Science, I bring a strong foundation in data analysis, dashboard development, and financial modeling—skills that align with Voya's need for detail-oriented, analytically rigorous interns across these functions.

My ISyE curriculum provides the quantitative foundation these roles require. Coursework in Regression & Forecasting, Statistical Methods, and Database Systems has prepared me to extract insights from large datasets, build predictive models, and create the reports and dashboards central to investment analytics and finance operations. My optimization and simulation training equips me to approach complex problems with structured, critical thinking—one of Voya's five critical skills that I am eager to develop further.

My experience demonstrates readiness across all three areas. As a consultant with Epic Intentions Consulting, I analyze multi-year financial and operational data for a nonprofit client, formulating hypotheses and presenting strategic recommendations to executive leadership—directly applicable to Voya's finance and analytics functions. As an undergraduate researcher with Georgia Tech's Sports Performance Intelligence lab, I design interactive dashboards and collaborate with an interdisciplinary team of engineers, pre-med students, and analysts to translate business requirements into technical solutions. Additionally, I have built end-to-end data pipelines using Python and SQL, developed machine learning analytics tools, and created Tableau dashboards for executive-level reporting—the exact technical stack described in Voya's Investment Data & Analytics role.

I am drawn to Voya's mission of fighting for everyone's opportunity for a better financial future. As an Eagle Scout who led a 7-month community initiative coordinating 30+ volunteers and a student who has traveled independently to 30+ countries, I share Voya's commitment to customer focus and inclusive impact. The opportunity to contribute to a company that manages retirement and investment solutions for over 15 million clients—while developing within a culture of continuous improvement—is exactly the kind of environment where I want to grow.

I am a U.S. citizen and available for your summer internship program. I would welcome the opportunity to discuss how my analytical skills and cross-functional experience can contribute to Voya Financial. Thank you for considering my application.

Sincerely,

Likhith Vallabhaneni
